Good Morning,

If you look at your submittal report sent with the last project assessment letter, the geotechnical report is identified as a required document (two copies - one for LDR-Geology and one for Project Manager).

Subject: Project No. 520606 - Federal Blvd MMCC - Adjacent Geotechnical reports

Good morning Kreg,

Following up on the meeting you had with Jim Bartell and Ben Peterson regarding this project, we have researched and found several geotechnical reports for properties near our project site and that are in the same geological hazard area.

The reports and locations are as follows:

1. 602 Euclid Ave. - dated May 2012
2. NW corner of Federal Blvd & 60th Ave. - dated January 1981 (nearest)

Can you please review these reports and indicate to us if either of the attached reports would be suitable to satisfy the requirement for a Geotechnical report as part of the Geology cycle issues?

We are checking with the City of Lemon Grove to see if they have anything, but it will take till Friday at the earliest for them to get back to us.

Thank you
