

DAILY SUPPLEMENT NO. 4.2

To: Craig Caes, Land and Water Quality Division — County of San Diego, Department of Environmental Health and Quality

From: Darryl Cotton, 6176 Federal Boulevard, San Diego, CA 92114 · (619) 954-4447 · 151DarrylCotton@gmail.com

Date: August 10, 2026

Re: United Rentals (North America), Inc., dba Reliable Onsite Services — 6144 Federal Boulevard, San Diego — Sewage Hauler Operating Permit LSHOP-000063; Division inspection DEH2026-ACOM-103865. Supplement No. 4.2 to Daily Supplement No. 4.1.

The two-stage operation at 6144 Federal Boulevard — dated captures, August 10, 2026

Yard security camera at 6144 Federal Boulevard, Monday, August 10, 2026: United Rentals' single-tank bulk tanker at rest and loaded (2:44 a.m.), departing the yard (2:50 a.m.), and returned approximately two hours later (5:00 a.m.). This is the bulk-truck (draw-out and transport) stage of the two-stage operation; native-format images and the accompanying video are available to the Division on request.

[See the August 10, 2026 FRAC tank pumping operation video](#)

1. Why this supplement is being filed

This is a supplement to Daily Supplement No. 4.1, and I am submitting it for one reason: on August 7, 2026 the City of San Diego produced its own records — its Public Utilities / Industrial Wastewater Control Program file on this operation. Those records bear directly on the Division's permit and on the matters already before you in 4.1. The City produced the file in response to my Public Records Act request No. 26-6533; the responsive records are Bates-stamped and provided as Exhibit 11.

I am not asking the Division to accept any characterization of mine. Every fact below is drawn from the City's own file or from El Cajon's own records already in 4.1, and is cited so the

Division can verify it directly. What the City's records add to 4.1 is the mechanism — they document, contemporaneously and in the City's own words, how and why this operation came to discharge at El Cajon rather than at the destinations the Division's permit authorizes.

2. The timeline — how Reliable Onsite came to discharge at El Cajon

The City's file lets that question be answered from the record rather than by inference:

October 2021. The City's Industrial Wastewater Control Program ("IWCP") makes first documented contact with Reliable Onsite Services at 6144 Federal Boulevard regarding permitting [Sup. 4.2, Exhibit No. 11, Bates 0153].

2022. Reliable Onsite holds a City Trucked Domestic Waste Hauler Permit (IU# 25-0604) that authorizes discharge of raw sewage only at the City's Pump Station 1, and only by California-plated, County-DEH-stickered trucks [Sup. 4.2, Exhibit No. 11, Bates 0163, 0160, 0156].

November 1–10, 2022. The City bars Reliable Onsite's out-of-state-plated trucks from Pump Station 1 and refuses any grace period, citing its codified Trucked Waste Requirements [Sup. 4.2, Exhibit No. 11, Bates 0162, 0171–0172]. A truck is turned away at Pump Station 1 on November 10 [Sup. 4.2, Exhibit No. 11, Bates 0165].

November 10, 2022 — the origin, documented. The same day, the City's own internal duty-call note records that Reliable Onsite itself raised El Cajon as the alternative, noting only that El Cajon's hours were more limited than the City's Harbor Drive station [Sup. 4.2, Exhibit No. 11, Bates 0165]. I want to be precise and fair: the switch to El Cajon began as a plate-driven workaround the company proposed after its out-of-state trucks were turned away — not, on this record, as anything more. The significance is not the reason for the switch; it is where the waste then went.

December 2022 onward. El Cajon disposal begins and runs 43 consecutive months — 5,445,200 gallons, billed \$536,896.72 [Sup. 4.1, Exhibit No. 7, Bates 0110–0112] — to a facility that appears on no version of the company's Sewage Hauler Operating Permit, LSHOP-000063, which authorizes disposal only at Pump Station #1 and OCSD Fountain Valley [Sup. 4.1, Exhibit No. 2, Bates 0020].

September 2025. By the operative City permit, only one California-plated truck was authorized to discharge at Pump Station 1. When the City's Industrial Wastewater Control Program notified United Rentals that its permit listed only that single vehicle and that out-of-state-plated trucks would not be permitted at Pump Station 1, Jeffrey Walker, United Rentals' Environmental Manager, responded that all of the company's trucks are "registered through the State of IN at a corporate level" [Sup. 4.2, Exhibit No. 11, Bates 0222] — against the fifteen-truck fleet the County permit authorized for 2025 [Sup. 4.2, Exhibit No. 11, Bates 0247]. Walker is the same United Rentals official who signed the Division's Sewage Hauler Operating Permit LSHOP-000063, under penalty of perjury, on September 18, 2024 [Sup. 4.1, Exhibit No. 2, Bates 0020].

June 2026. On my complaint, City IWCP determines the 6144 site is not permitted by its program because nothing is discharged to the sewer — the waste is held in an on-site tank and hauled off-site — and refers the matter to this Division as “an environmental health issue” [Sup. 4.2, Exhibit No. 11, Bates 0261, 0265, 0267].

The through-line is simple: the company lost lawful access to the City’s permitted, monitored discharge point, and the volume moved to El Cajon — off the destinations its own sworn County permit authorizes.

3. What, in the City’s records, should be worthy of the Division’s interest

I respectfully direct the Division to the following, each of which sits squarely within its jurisdiction.

(a) Destination compliance is the Division’s question, and only the Division’s. The Sewage Hauler Operating Permit LSHOP-000063 authorizes disposal only at Pump Station #1 and OCSD Fountain Valley [Sup. 4.1, Exhibit No. 2, Bates 0020]; the permit states on its face that it “is not a City or County use permit” [Sup. 4.2, Exhibit No. 11, Bates 0271]. The El Cajon disposal — 5.4 million gallons over 43 months — is therefore off the permit’s authorized destinations.

The City has confirmed it does not regulate this operation (no sewer discharge) and has formally referred it here [Sup. 4.2, Exhibit No. 11, Bates 0261, 0265]; the Air Pollution Control District has disclaimed the odor. The Division is the sewage-hauler permitting authority. Whether hauled waste went to an unauthorized destination is not a question that can be deferred to another agency — it is the central term of the permit the Division issued. On the yard visits to date the operation was found “in compliance with the pumper truck permit,” but those visits examined the yard, not the destination; the destination is what the record now puts in question.

(b) The sworn certifications warrant verification against the record. On the City’s permit application the company’s Environmental Manager certified, under penalty of perjury, that the wastes are not hazardous, that “all wastes to be hauled under this permit originate within San Diego County,” and that no industrial waste is hauled [Sup. 4.2, Exhibit No. 11, Bates 0269, 0276].

These representations should be squared against (i) the company’s own statement that “we have 2 San Diego locations that utilize your facility” [Sup. 4.1, Exhibit No. 6, Bates 0103], which bears on the single-source premise, and (ii) the on-site FRAC-tank storage and accumulation the City itself describes — an activity the domestic hauling permit does not address.

The City’s file also surfaces two record-integrity points the Division can reconcile against its own permit file. First, the County-permitted fleet grew from eleven trucks in 2024 to fifteen in 2025 [Sup. 4.2, Exhibit No. 11, Bates 0275, 0247]. Second, when the City reviewed the company’s 2025 filing it found that the County sticker number the company carried did not match any number on the current DEH permit [Sup. 4.2, Exhibit No. 11, Bates 0246] — the County’s decal

series for this permit having changed from the 402x series to the 025xxx series between 2024 and 2025 [Sup. 4.2, Exhibit No. 11, Bates 0275, 0247]. Neither is dispositive standing alone, but both bear on the accuracy of the permit record the Division maintains for this hauler.

(c) The on-site storage sits in a gap the City expressly handed to the Division. City IWCP found the material is held in a fixed on-site tank “not connected to sewer” and “pumped out as needed and hauled off-site” — and disclaimed jurisdiction because nothing reaches the sewer [Sup. 4.2, Exhibit No. 11, Bates 0261]. No City program reaches the on-site bulk storage of septage in that tank.

The City did not close the matter; it referred it to this Division as an environmental-health issue [Sup. 4.2, Exhibit No. 11, Bates 0265]. The condition the City described in 2022 — modest wash-water, emptied “as needed” — does not match a fixed bulk tank fed continuously and drawn to El Cajon at the scale 4.1 documents. That gap is itself a reason a current inspection reaching the tank is warranted.

(d) The operation ran on the receiving side neither testing nor recording. The City’s program is built on manifests, registered trucks, and DEH stickers at Pump Station 1 [Sup. 4.2, Exhibit No. 11, Bates 0156, 0160]. El Cajon’s receiving side, by contrast, ran on self-service sign-in by plate, and — as its own Public Works staff has confirmed — does not pH-test these loads; the individual sign-in sheets were withheld from production.

That the hauler had to ask El Cajon, in writing on July 8, 2026, “does your team do PH testing?” [Sup. 4.1, Exhibit No. 6, Bates 0109] tells the Division that the material’s characterization was neither verified at the receiving station nor assumed by the hauler to be. My concern is not the hour or the distance; it is that a monitored program would scrutinize what an unmonitored one accepts untested.

(e) The manifest record has a hole on both ends. The City’s manifests exist only for discharges at Pump Station 1 [Sup. 4.2, Exhibit No. 11, Bates 0163]. Nothing in the record captures what enters the FRAC tank or what left it for El Cajon.

With no monitoring by any governing agency, none at the receiving station, and no inflow record by the hauler, the only hard, verifiable measure of this waste stream is El Cajon’s own meter — 5.4 million gallons [Sup. 4.1, Exhibit No. 7, Bates 0110–0112]. That absence of records is not a gap in the concern; it is the condition that let the arrangement run.

(f) The material is subject to prohibited-discharge limits, and on this record no one confirmed it met them. Hauled domestic septage introduced to a public sewer is subject to the General Pretreatment Regulations’ prohibited-discharge rules — nothing that creates a fire or explosion hazard, and nothing corrosive, a floor that bars any discharge below pH 5.0 (40 C.F.R. § 403.5(b)(1)–(2)). Federal guidance provides that hauled waste may be introduced only at points the receiving agency has designated and can control (U.S. EPA, National Pretreatment Program — Hauled Waste).

That is precisely the function of the destination term in the Division's permit: Pump Station #1 and OCSD Fountain Valley are designated, pretreatment-controlled receiving points within the Metropolitan system. The concern the City's records sharpen is that the material did not go there. It was held first in a fixed bulk tank not connected to the sewer — the condition under which stored septage turns anaerobic and generates hydrogen sulfide, corrosivity, and the potential for depressed pH (U.S. EPA, Guide to Septage Treatment and Disposal, EPA/625/R-94/002) — and was then taken to a receiving point that, on the record, neither characterized nor pH-tested it.

I want to be careful here: I do not assert that any load breached the pH-5.0 floor. I cannot, because on this record no one measured it — and that is the point. Whether 5.4 million gallons of stored, anaerobically-altered septage, discharged over 43 months, met the prohibited-discharge limits that govern hauled waste is the very question the permit's destination term exists to guarantee, and the question the chosen destination left unanswered. That is a matter of characterization and destination control — squarely within the Division's permitting authority — not one of odor, which is where it has so far been deflected.

(g) The permit's two authorized destinations are both controlled receiving points — which is precisely why El Cajon is the one that matters. A fair reading of this record has to ask: if not El Cajon, then where? The permit authorizes only two destinations, and both are the opposite of El Cajon's self-service model.

Pump Station #1 required California plates, County-DEH stickers, and a manifest for every load — and it turned the company's out-of-state trucks away [Sup. 4.2, Exhibit No. 11, Bates 0156, 0160, 0162, 0165]. The other authorized destination, OCSD's Fountain Valley wastehauler station, operates under the Orange County Sanitation District's Wastewater Discharge Regulations (OCSD-53), which require a Wastehauler Discharge Permit, a Waste-Tracking Form documenting each load's source, volume, and characteristics, discharge only at designated points, and — critically — authorize the District to collect and analyze samples of each hauled load, pH included (OCSD-53 §§ 210.A, 210.I).

In other words, the two destinations the Division's own permit authorizes are both permitted, manifested, and sampling-capable — as controlled as, or more controlled than, the City's Pump Station 1. El Cajon, by contrast, is the single receiving point in this record that imposed none of those controls: self-service sign-in by plate, no pH testing, and sign-in sheets withheld from production — nor, on my understanding, was El Cajon required to impose them. A receiving station of this kind was not obligated to characterize or pH-test what a permitted hauler delivered, and was entitled to rely on the hauler's certification; that responsibility runs with the hauler. It runs there by the Division's own permit: in signing Sewage Hauler Operating Permit LSHOP-000063, the permittee agreed, under penalty of perjury, to “conform to all conditions, orders, and directions issued pursuant to the California Health and Safety Code and all applicable County and City Ordinances including California Health and Safety Code Division

104, Part 13, Chapter 4, Article 1, and San Diego County Code sections 68.601–68.613” — Jeffrey Walker signing for United Rentals [Sup. 4.1, Exhibit No. 2, Bates 0020]. That undertaking, together with the General Pretreatment Regulations (40 C.F.R. § 403.5), places the duty to characterize this waste and keep it within the prohibited-discharge limits on the permittee-hauler, not on the receiving station. The significance for the Division is structural, not a matter of intent: bulk-stored septage of uncharacterized pH taken to either authorized destination would meet exactly the manifesting and sampling that El Cajon did not apply.

The volume did not drift to a closer or more convenient lawful station; on this record it moved to the only receiving point among the operation’s options where hauled material is accepted without the permitting, manifesting, and sampling the two authorized destinations require. The City’s records also show why the company’s use of even its own monitored, authorized destination warrants examination: the company represented in writing that “all of our trucks are registered through the State of IN at a corporate level” [Sup. 4.2, Exhibit No. 11, Bates 0222], while Pump Station #1 required a California plate, registration in the City’s system, and a manifest for every discharge — such that only one truck was ever authorized to discharge there.

How much of this waste stream was ever discharged at Pump Station #1, as against the volume routed to El Cajon, is a question the City’s discharge records answer. I have submitted a Public Records Act request to the City for the Pump Station #1 discharge manifests, vouchers, logs, and truck-authorization roster for this account (**City of San Diego PRA No. 26-7900, submitted August 8, 2026; Exhibit 13**).

Whether OCSD Fountain Valley in fact received any part of this waste stream is a discrete factual question I am running down the same way: I have submitted a California Public Records Act request to that district for the company’s wastehauler permit, discharge manifests, Waste-Tracking Forms, load-sampling results, and correspondence (**OCSD Ref. No. P004671-080826, submitted August 8, 2026; Exhibit 12**). Both requests have been received and assigned the reference numbers shown, and their determination clocks are running; I will supplement the Division with the responses as they arrive. On the present record, the two authorized destinations’ controls are documented, and the actual 5.4-million-gallon volume is accounted for only at El Cajon’s unmonitored meter.

(h) The FRAC tank makes this a compliance question only the permittee’s records can answer — which is why it is the Division’s concern. The operation runs in two stages: dual-tank vacuum trucks pump collected septage *into* a fixed on-site FRAC tank of substantial capacity — its precise rating is the permittee’s to confirm — and a single-tank 4,000-gallon bulk truck later draws *out* of that tank for transport and discharge. The two-stage operation just described — vacuum trucks discharging into the tank, a bulk truck drawing out — is documented in dated video and photographic evidence; dated examples are reproduced at the top of this supplement, and the complete dated log of these captures is provided as Exhibit 14,

with native-format files available to the Division on request. The tank-storage period runs from February 2024, when the FRAC tank was installed, through June 2026 — 29 of the 43 months, and roughly 4.2 million of the 5.4 million gallons [Sup. 4.1, Exhibit No. 7, Bates 0110–0112]; before that, the operation direct-hauled.

Because the tank is fed continuously and cannot be shown to be emptied with each draw, its contents accumulate and re-seed — material that entered days earlier ferments while more is added, so what a bulk truck draws out is not what any one truck brought in. That is precisely why compliance with the prohibited-discharge limits (40 C.F.R. § 403.5(b)) cannot be established from the receiving side, from the volume meter, or by inspecting the yard for spills.

The only records that could establish it are the permittee's own: the septage each truck brought into the tank, by date, time, and volume; and pH characterization of the tank's contents tested *before* each draw into the bulk truck bound for El Cajon or any other point. On this record no such characterization was performed or produced — indeed, the hauler asked El Cajon in writing whether El Cajon does pH testing [Sup. 4.1, Exhibit No. 6, Bates 0109].

This is squarely the Division's concern for two reasons: the permittee's duty to know and truthfully certify what it hauls runs with the LSHOP-000063 permit the Division issued — and having certified it would conform to the discharge limits, the permittee bore the responsibility to create the septage-in, septage-out record that would show it did: inflow characterized by truck, date, and volume, and pH characterization of the tank's contents before each bulk draw. The records that would answer the question sit in the Division's own permit file (the application and renewals) and behind a current inspection reaching the tank. If those records do not exist, then the permittee cannot demonstrate that the roughly 4.2 million gallons of stored, anaerobically altered septage met the limits that govern hauled waste — and a “compliance” finding made without them rests on an assumption the record does not support.

4. What I am and am not asking

I am not asking the Division to reach any conclusion about intent, and nothing here should be read that way. I am asking the Division to weigh two narrow, factual questions its own permit frames: whether the operation the Division reviewed and found compliant is the operation the permit authorized — a permit whose authorized destinations are Pump Station #1 and OCSF Fountain Valley, not El Cajon — and whether the material discharged over these 43 months met the prohibited-discharge limits that govern hauled waste, a question that, on this record, was never tested.

Both point to the same step: a current inspection reaching the on-site tank and the destination question, in light of the City's own records.

5. A request for the status of the Division's action on Supplement 4.1

I also respectfully ask the Division to advise me what action, if any, it has taken in response to Supplement 4.1 since I transmitted it on August 6, 2026. In particular, I would like to know:

- whether the Division has yet contacted the **City of El Cajon** — the facility that, on these records, actually received this waste stream over 43 months — regarding disposal at a destination the Division's permit does not authorize;
- whether the Division has contacted the permittee, United Rentals (North America), Inc., about the off-permit disposal and the on-site FRAC-tank storage the City referred here; and
- whether the Division has coordinated with the City of San Diego's Industrial Wastewater Control Program, which referred this matter to the Division, or with the State or Regional Water Quality Control Board.

I ask not to second-guess the Division's process, but because this operation is one the Division alone permits, because the City has formally placed the destination and on-site-storage questions in the Division's hands, and because the residents living around this operation have raised health and environmental concerns that depend on whether the responsible agencies act on what the records show.

If the Division has taken these steps, I would be grateful to know it. If it has not yet, I ask that it do so, and I remain available to assist. I raise the question plainly because a determination of "in compliance" that was made without reaching the destination — and without contact with the receiving facility that took 5.4 million gallons off-permit — is one I believe the record now calls on the Division to revisit.

I would add only this: the concern is prospective as well as historical. For as long as this operation continues, the same bulk-stored, uncharacterized septage can keep moving off-permit — to El Cajon, or to any other public receiving station the operation may use — so each month the destination and characterization questions go unaddressed is another month of the same waste stream entering the public sewer system untested, and another receiving community potentially exposed. That is why I am asking the Division to act on the information in Supplement 4.1 now, rather than treat that submission as closed.

Respectfully submitted,

Hello,

My name is Kimber Husak and I am contacting you on behalf of the Industrial Wastewater Control Program for the City of San Diego in hopes of getting in contact with Luis Campuzano of Reliable Onsite Services located at 6144 Federal Blvd, San Diego, CA 92114.

It is a requirement of the municipal code for any facilities that generate and dispose of process-related wastewater to apply for an industrial user discharge permit. Please email me back at khusak@san Diego.gov so I may forward you the necessary application as well as schedule an inspection.

Thank you,
Kimber Husak

Hello Jesus,

It was a pleasure meeting you. I have attached a pdf copy of the application I left with you. Please have a company representative complete the application to the best of their ability and return to me by March 10th, 2022. This application will give me information about water usage at the facility, including industrial wastewater discharges. After the application is completed, an inspection of the facility will be scheduled. Based on information gathered during this process, I will be able to determine if your facility will need an industrial wastewater discharge permit.

If you have any questions, please reach out to me.

I have included a link below with more information regarding the Industrial Wastewater Control Program and Industrial User Discharge Permits.

Subject: [EXTERNAL]Trucked Waste 25-0604 Manifest?

Hello,

Hope this email finds you well, wanted to reach out and ask about clarification on a license plate # listed on the waste manifest attached.

Our records show that the license plate noted (#3284107) is not listed for the permit 25-0604. The license plate # is not listed for use for permit 25-0604. When discharging at Pump Station 1 under your trucked waste permit you need to use only approved trucks/trailers.

Please as soon as possible provide the truck/trailer model, capacity, and year for license plate #3284107 so that I can add the truck/trailer under your permit. Once I receive the information requested, I should be able to process the manifest associated with 25-0604 and add the truck/trailer using plate #3284107 for future use under the permit.

Thank you,

[TW Requirements and Procedures.pdf](#)

Hello,

Thank you for reaching out about adding this truck/trailer to the Trucked Waste Permit. My name is Lazaro Joya and I am the Trucked Waste Inspector for this month and will be assisting you on this matter. After reviewing the attachments, I had a couple of questions/comments:

1. I noticed that the registration is for the State of Minnesota, do you have the truck/trailer registered in California? If so, can you provide confirmation that the license plate number is for CA. If at the moment you only have the Minnesota license/registration, then I will advise you that in order to discharge at pump station 1 you need to have a valid CA license plate. *In this case we will provide a temporary license plate number as a place holder. That temp license number will be what the drivers will need to put down on the manifest instead of the MN license plate info. The temp license plate number is valid for one year at which point you should have a valid CA license plate for the truck/trailer which will be updated on our system.*
2. Since the Trucked Waste Permit that United Rental holds is for domestic waste hauling has United Rental received a DEH permit sticker for this particular truck/trailer? The Department of Environment and Health for the County of San Diego issues out DEH hauling permits for any domestic waste haulers operating in San Diego County. Proof of the DEH permit that includes the truck/trailer listed needs to be provided in order to add the truck/license plate.

Once you have the DEH permit sticker number for the associated truck/trailer then I will be able to add the truck/trailer under the permit with a temp license plate number to use for the manifest every time a discharge is performed with the truck/trailer. Attached you will find our TW requirements and Procedures document with lots of information on the program and the trucked waste permits. Section A may be of most use as that section deals with Domestic Haulers.

Thank you,

Lazaro Joya

Good morning Jeffrey,

This is Anh Nguyen with the Industrial Wastewater Control Program. One of our attendants notified us that your company is using a truck with an out-of-state license plate (see photo below). Section A and C of The Trucked Waste Requirements and Procedures (attached) stated that each truck is required to have a California license plate. I will inactivate the truck with License # 3224527 in our system today. Please note this truck (with License # 3224527) and any trucks with out-of-state license plates will not be allowed to discharge at our Pump Station 1 until they have a CA license plate. Once you have the CA license plate, please let us know and we will add the truck to our system so you will be able to use it.

Thank you,

Anh Nguyen

Subject: [EXTERNAL]CA License Registration for Trucks - United Rentals (NA) Inc; DBA Reliable Onsite Svcs (IU# 25-0604)

Hello Mike,

I received your request regarding the out of state trucks you are receiving. Unfortunately we do not allow any trucks to discharge to Pump Station 1 without a CA license and being registered in our database for the Domestic Trucked Waste Permit. Temporary permits are also no longer issued in the interim.

The Domestic Trucked Waste Permit (IU# 25-0604-03A) was renewed for United Rentals (NA) Inc; DBA Reliable Onsite Svcs and allows discharge of raw sewage to Pump Station 1 when hauled by the following trucks:

License	Make Model	Year	Capacity
01851Y2	HINO 268	2020	1100
3145317	HINO 268	2020	695

3213370	PETERBILT	2021	1100
3224519	PETERBILT 337	2021	1100
3284107	MACK F/B	2022	695
76662Y2	FORD F-550	2020	800

Please use the trucks listed above for discharging to PS1 until the new trucks are registered in California. Once registered, please supply the License, Make/Model, Year, Capacity and new County Health Permit with stickers I can add the new trucks to your existing permit.

I apologize for any inconvenience.

Thank you,

Subject: Truck Waste Duty Call (11/10/22)
Date: Thursday, November 10, 2022 1:41:19 PM

Hi Anh,

There was a duty call today regarding truck waste.

Contact: Mike

Company: United Rentals/Reliable Onsite Services

IU: 25-0604 (old), 10-0568 (pending)

Email: lcampuzano@ur.com

Issue: Apparently the company is receiving company trucks from out of state and they are having issues dumping into the Harbor Drive disposal. The problem stemmed from having license plates not in California for the trucks they use. The corporate office is in the process of transferring the truck registrations to California. He is looking for alternatives or an allowance in the interim? Can you reach out to him and provide him the options or what is allowed? He mentioned disposing in El Cajon, but the issue was availability of hours is limited compared to the Harbor Drive location.

Regards,

Michael Beto

Attachments: [Outlook-dzix3u4g.png](#)

Hi Sara,

Anh forwarded this issue to my attention. We have been training new staff and we did not catch this error until one of our pump station attendants noticed the out of state license. I am sorry for the inconvenience this has caused, but our program has not allowed out of state plates since its inception, and the policy is outlined in our Trucked Waste Requirements and Procedures. As apart of the permit renewal, Environmental Manager Jeffrey Walker signed the Trucked Waste Requirements Certification on 9/7/2022, which certified they were familiar with the current Trucked Waste Requirements and Procedures, including the California License requirement in Section A2d. I appreciate the information on the apportioned licensing, but we only accept California licensed vehicles because of the strict rules and regulations that California has on the handling of waste. For example, the prohibition of waste mixing (non-RCRA hazardous, hazardous waste, domestic, or industrial wastes).

Please let me know if you have any additional questions and again I am sorry for the inconvenience this has caused you.

Thank you,

Steven Jarvis

Anh,

Jeffrey reach out to me regarding the Apportioned plates we run for our all of our company vehicles. Apportioned licensing is used throughout the united States and Canada, allowing us to legally operate in any area of the United States. Because we are an international company, this eases our fluid fleet. You can see in the attached registration, our vehicle is considered to be registered in California. Is there another valid reason a CA plate would be required?

Subject: [EXTERNAL]Trucked Waste Permit Renewal Notice - United Rentals

Hello,

The Trucked Waste Permit issued to your firm expires October 1st, 2023. Trucked Waste Permits are

valid for one year and are required for all hauled discharges to the City of San Diego's Pump Station 1. If you wish to renew this permit, please complete and submit the following documents **as soon as possible but no later than September 22rd, 2023**. Failure to submit the renewal documents will result in delays and potential denial of your renewal permits. If you do not need a renewal of your permit, please let me know.

Domestic Waste Hauler Permits

1. A signed [Trucked Domestic Waste Hauler Permit Application](#)
2. A current copy of the "Permit to Operate Septic Pumper Truck Operation" issued by the County of San Diego Department of Environmental Health (DEH): [DEH Permit Application](#)
3. A signed current Trucked Waste Requirements Certification form located on the last page of the [Trucked Waste Requirements and Procedures](#)

The most recent version of these documents can be found on the Program's website at:
<https://www.sandiego.gov/public-utilities/permits-construction/industrial-user-permits/trucked>

The cost for these permits can be found on our website at <https://www.sandiego.gov/public-utilities/permits-construction/industrial-user-permits>. This amount will be billed to your firm at a later date; please do not send your permit fee with the renewal application. Approved permit renewals, once complete, will be sent out on the last business day of the month prior to the permit expiration date. If I can answer any questions about the trucked waste program, please notify my office using the contact information below.

Thank you,

Hello,

The Trucked Waste Permit issued to your firm expires October 1st, 2023. Trucked Waste Permits are valid for one year and are required for all hauled discharges to the City of San Diego's Pump Station 1. If you wish to renew this permit, please complete and submit the following documents **as soon as possible but no later than September 22nd, 2023**. Failure to submit the renewal documents will result in delays and potential denial of your renewal permits. If you do not need a renewal of your permit, please let me know.

Domestic Waste Hauler Permits

1. A signed [Trucked Domestic Waste Hauler Permit Application](#)
2. A current copy of the "Permit to Operate Septic Pumper Truck Operation" issued by the County of San Diego Department of Environmental Health (DEH): [DEH Permit Application](#)
3. A signed current Trucked Waste Requirements Certification form located on the last page of the [Trucked Waste Requirements and Procedures](#)

The most recent version of these documents can be found on the Program's website at:

<https://www.sandiego.gov/public-utilities/permits-construction/industrial-user-permits/trucked>

The cost for these permits can be found on our website at <https://www.sandiego.gov/public-utilities/permits-construction/industrial-user-permits>. This amount will be billed to your firm at a later date; please do not send your permit fee with the renewal application. Approved permit renewals, once complete, will be sent out on the last business day of the month prior to the permit expiration date. If I can answer any questions about the trucked waste program, please notify my office using the contact information below.

Thank you,
David Mayo

Good Afternoon,

In order to help prevent voucher/manifest errors and any resulting Notice of Violations, **all haulers discharging to Pump Station 1 are now required to show a copy of the appropriate discharge permit(s) to the Trucked Waste Attendant.**

Industrial Waste Haulers will need to show a copy of their Industrial Waste Hauler Permit **and** the Industrial Waste Generator's Permit.

If you do not have a copy of your permit, please request one from us now and put a copy in each vehicle.

Reminder: Keeping a copy of your TW permit in each vehicle is a requirement of the Trucked Waste Requirements and Procedures.

Hello,

Currently as submitted, we will only be able to permit for 01851Y2, as 76662Y2 states that the decal is not issued yet and will be inspected at a later date, as well as the DEH permit not containing the sticker number associated with it.

Also we require a **signature** on the application page of the permit. Please resubmit as soon as possible, as the complete application is currently late will result in a lapse in permitting for your facility.

Reliable Onsite Services FAC-8102

Hello,

The Trucked Waste Permits issued to your firm expires October 1st, 2024. Trucked Waste Permits are valid for one year and are required for all hauled discharges to the City of San Diego's Pump Station 1. If you wish to renew this permit, please complete and submit the following documents **no later**

than September 20th, 2024. If the renewal documents are not received by July 19th, 2024, IWCP cannot guarantee the permit will be renewed on time. If you do not need a renewal of your permit, please let me know.

Domestic Waste Hauler Permits

1. A signed [Trucked Domestic Waste Hauler Permit Application](#) current copy of the “Permit to Operate Septic Pumper Truck Operation” issued by the County of San Diego Department of Environmental Health (DEH): [DEH Permit Application](#)
2. A signed current Trucked Waste Requirements Certification form located on the last page of the [Trucked Waste Requirements and Procedures](#)

The most recent version of these documents can be found on the Program’s website at: <https://www.sandiego.gov/public-utilities/permits-construction/industrial-user-permits/trucked>

The cost for these permits can be found on our website at <https://www.sandiego.gov/public-utilities/permits-construction/industrial-user-permits>. This amount will be billed to your firm at a later date; please do not send your permit fee with the renewal application. Approved permit renewals, once complete, will be sent out on the last business day of the month prior to the permit expiration date. If I can answer any questions about the trucked waste program, please notify my office using the contact information below.

Thank you,
David Mayo

Good Morning David,

Thanks for the follow up – please find attached the signed application.

For those trucks that are decaled and we need to transfer the registration – is it possible to permit them while we are going through the CA registration process?

Thanks

Jeff

Hello,

Currently as submitted, we will only be able to permit for 01851Y2, as 76662Y2 states that the decal is not issued yet and will be inspected at a later date, as well as the DEH permit not containing the

sticker number associated with it.

Also we require a **signature** on the application page of the permit. Please resubmit as soon as possible, as the complete application is currently late will result in a lapse in permitting for your facility.

Thank you,
David Mayo

Hi David -

I apologize- never removed old County Stickers from the list.

I can revise and resend.

All trucks on the list will be used - there are a few new ones.

Do you need which decal is assigned to which truck?

Jeff

[Licensed Septic Pumpers.pdf](#)

Hello Trucked Waste Team,

I just spoke with Brandi Coley who works at the County of San Diego. She clarified the [San Diego County Code](#) defines a "SEWAGE PUMPING VEHICLE" as any vehicle used for the collection and transportation of sewage and said technically this would include a luxury portable restroom if the actual restroom trailer is used to haul waste. (She originally was more focused on whether or not the company has a pumper truck, so I think the practice of permitting a restroom trailer is not common). However, she mentioned companies with luxury portable restrooms could be hiring a company that has a pumper truck and is already permitted to pump the waste prior to re-locating the restroom trailer. She said if this is the case, the company with luxury portable restrooms would not need a County Sewage Hauler Permit.

She said if Ron at Posh Privy has any additional information he can reach out to her directly since she is now familiar with the issue.

[@Mayo, David](#) will you please send a follow up email to Ron and let him know if he hasn't reported his compliant to the County of San Diego, that we encourage him to do so and to please send all information to Brandi Coley at Brandi.Coley@sdcounty.ca.gov.

We can discuss this topic further at the Trucked Waste Meeting next week!

Thank you,
Kimber

Hello Kimber,

I left you a voicemail regarding your email below. A list of currently licensed sewage haulers are attached. We currently in the renewal process and have received a few applications but I do not believe either of the listed companies are one of them. To your knowledge, do either of these companies actually have a sewage pumper vehicle? I went to their websites and only see advertisements for portable toilet rental units for events and such.

Please do not hesitate to contact me with any questions or concerns.

Good Morning,

My name is Kimber Wick and I am currently the Lead Trucked Waste Inspector for the City of San Diego's Trucked Waste Program. I was hoping to get in contact with someone to discuss the referral below.

The individual who made the referral, Ron Pivaro, has reiterated his concerns to us again this year. The Trucked Waste Program is looking into these referrals to see if there are any actions we can take on our end, but first we'd like to find out if the these two locations have a 'Permit to Operate Septic Pumper Truck' from the County of San Diego.

Please reach out to me to discuss. My email is KWick@sandiego.gov, my office phone is 619-533-6603 (Tues-Thurs), and my work cell phone is 619-333-6301 (Mon & Fri).

Thank you,

Kimber Wick

Hello Jeffrey,

After looking at the application that you submitted, I have a few questions/ requests before proceeding with the review of the application:

1. The city of San Diego only permits trucks or trailers with California license plates to discharge at Pump station 1. Please update vehicle list with only California licensed vehicles.
2. Please indicate which county sticker numbers are for each of the vehicles on your vehicle list.
3. Please confirm that your billing address is :UNITED RENTALS DBA RELIABLE ONSITE SERVICES, C/O ACCOUNTS PAYABLE BRANCH 70M, PO BOX 30129 College Station, TX 77842

Thank You,

Hello Jeffrey,

I have attached your current permit which only has one vehicle listed.

The City of San Diego requires that trucks be licensed in California and will not permit trucks with out of state licenses to dump at Pump Station 1. Please review Section A, part 2d of the attached TWRP for more information.

Thank You,
Michael McClelland

Hi Michael,

Thanks for reaching out.

I've included the County Sticker #'s for each vehicle.

In regards to the license plate numbers, all of our trucks are registered through the State of IN at a corporate level. We included the same truck list/license plates in our past submittals. Please let me know if there is additional information that I could supply in order to process our application.

Yes – that is the correct billing address.

Thanks

Jeff

Hello Jeffrey,

After looking at the application that you submitted, I have a few questions/ requests before proceeding with the review of the application:

1. The city of San Diego only permits trucks or trailers with California license plates to discharge at Pump station 1. Please update vehicle list with only California licensed vehicles.
2. Please indicate which county sticker numbers are for each of the vehicles on your vehicle list.
3. Please confirm that your billing address is :UNITED RENTALS DBA RELIABLE ONSITE SERVICES, C/O ACCOUNTS PAYABLE BRANCH 70M, PO BOX 30129 College Station, TX 77842

Thank You,
Michael McClelland

Hello,

The Trucked Waste Permits issued to your firm expires September 30th, 2025. Trucked Waste Permits are valid for one year and are required for all hauled discharges to the City of San Diego's Pump Station 1. If you wish to renew this permit, please complete and submit the following documents **no later than September 15th, 2025**. If the renewal documents are not received by September 15th, 2025, IWCP cannot guarantee the permit will be renewed on

time. If you do not need a renewal of your permit, please let me know.

Domestic Waste Hauler Permits

1. A signed [Trucked Domestic Waste Hauler Permit Application](#)
2. A current copy of the "Sewer Hauler Operating Permit" issued by the County of San Diego Department of Environmental Health (DEH)
3. A signed current Trucked Waste Requirements Certification form located on the last page of the [Trucked Waste Requirements and Procedures](#)

The most recent version of these documents can be found on the Program's website at:

<https://www.sandiego.gov/public-utilities/permits-construction/industrial-user-permits/trucked>

The cost for these permits can be found on our website at <https://www.sandiego.gov/public-utilities/permits-construction/industrial-user-permits/fees>. This amount will be billed to your firm at a later date; please do not send your permit fee with the renewal application. Approved permit renewals, once complete, will be sent out on the last business day of the month prior to the permit expiration date. If I can answer any questions about the trucked waste program, please notify my office using the contact information below.

Thank You,

Hello Jeff,

The County sticker number 4029 on the app does not match any number on the DEH permit (see screenshots below). Please provide an update.

the discharge of material wastes is prohibited under this permit. All applicants to discharge material wastes must be submitted separately.

6) List the trucks/trailers that you would like permitted to haul domestic wastes.
For tractor/trailers, provide information for the trailer only. Each truck is required to have a California license plate. Trucks not listed will not be allowed to discharge wastes.

Subject: RE: United Rentals_Trucked Waste Renewal Notice -United Rentals (NA) Inc DBA Reliable Onsite Services (FAC-8102, PMT-37888)

Hello Jeff,

The County sticker number 4029 on the app does not match any number on the DEH permit (see screenshots below). Please provide an update.

The discharge of industrial wastes is permitted under this permit. An application to discharge industrial wastes must be submitted separately.

6) List the trucks/trailers that you would like permitted to haul domestic wastes.
For tractor/trailers, provide information for the trailer only. Each truck is required to have a California license plate. Trucks not listed will not be allowed to discharge wastes.

Truck/Trailer Make/Model	Year	Capacity (gallons)	License Plate	County Sticker Number

Hello Jeffrey,

I have attached your current permit which only has one vehicle listed.

The City of San Diego requires that trucks be licensed in California and will not permit trucks with out of state licenses to dump at Pump Station 1. Please review Section A, part 2d of the attached TWRP for more information.

Thank You,
Michael McClelland

Hi Michael,

Thanks for reaching out.

I've included the County Sticker #'s for each vehicle.

In regards to the license plate numbers, all of our trucks are registered through the State of IN at a corporate level. We included the same truck list/license plates in our past submittals. Please let me know if there is additional information that I could supply in order to process our application.

Yes – that is the correct billing address.

Thanks

Jeff

Hello Jeffrey,

After looking at the application that you submitted, I have a few questions/ requests before proceeding with the review of the application:

1. The city of San Diego only permits trucks or trailers with California license plates to discharge at Pump station 1. Please update vehicle list with only California licensed vehicles.
2. Please indicate which county sticker numbers are for each of the vehicles on your vehicle list.
3. Please confirm that your billing address is :UNITED RENTALS DBA RELIABLE ONSITE SERVICES, C/O ACCOUNTS PAYABLE BRANCH 70M, PO BOX 30129 College Station, TX 77842

Thank You,

Michael McClelland

Hello,

The Trucked Waste Permits issued to your firm expires September 30th, 2025. Trucked Waste Permits are valid for one year and are required for all hauled discharges to the City of San Diego's Pump Station 1. If you wish to renew this permit, please complete and submit the following documents **no later than September 15th, 2025**. If the renewal documents are not received by September 15th, 2025, IWCP cannot guarantee the permit will be renewed on time. If you do not need a renewal of your permit, please let me know.

Domestic Waste Hauler Permits

1. A signed [Trucked Domestic Waste Hauler Permit Application](#)
2. A current copy of the "Sewer Hauler Operating Permit" issued by the County of San Diego Department of Environmental Health (DEH)
3. A signed current Trucked Waste Requirements Certification form located on the last page of the [Trucked Waste Requirements and Procedures](#)

The most recent version of these documents can be found on the Program's website at: <https://www.sandiego.gov/public-utilities/permits-construction/industrial-user-permits/trucked>

The cost for these permits can be found on our website at <https://www.sandiego.gov/public-utilities/permits-construction/industrial-user-permits/fees>. This amount will be billed to your firm at a later date; please do not send your permit fee with the renewal application. Approved permit renewals, once complete, will be sent out on the last business day of the month prior to the permit expiration date. If I can answer any questions about the trucked waste program, please notify my office using the contact information below.

Thank You,

Hi Jacob,

Are you referring to our Trucked Waste Permit?

We submitted the application in Sept. and have not received a copy of it. That typically comes from your office doesn't it?

Here is the one David provided to us that expired in Sept.

We haven't received the updated one that was sent in for renewal (See attached).

****This email came from an external source. Be cautious about clicking on any links in this email or opening attachments.****

Mr. Jacob Garcia,

I visited your office a few weeks ago to see if there were records and permits of the United Rentals human waste processing being done at their 6144 Federal Blvd. SD CA 92114 property. I am the neighboring property owner at 6176 Federal Blvd. and the noise and smell from this operation has gotten to be intolerable. The 10 or more vacuum trucks who bring the daily porta-potty waste into the FRAC tank use this as their central storage tank for the waste. My question is where does it go once it's in the FRAC tank? Is this a completely compliant process with your agency?

Thank you in advance for your assistance.

Darryl Cotton

Stephen,

Thank you for the call and reply today. Since you were able to confirm that United Rentals does not discharge any batch processed waster into the sewer under their current Industrial Discharge Permit I would ask you to consider that whatever is being sent to their FRAC tank should require a manifest as to when it is full and the collected fluids are transferred to a licensed facility to process that waste. As it stands now I only know that the stench coming off of that tank is incredibly obnoxious and per Ms. Melanie Sanchez, APCD Investigator under their case no. APCD2026-CMP-1888 stated that while she was able to smell the strong odor coming off that "sealed" tank, I'm being told that APCD does not have jurisdiction for this type of odorous enforcement. While I had believed that they did have this authority under Rule 51, Ms. Sanchez tells me that is not the case.

I would ask you to consider the 3 attachments insofar as how this tank is being used and if any aspect of this is regulated by IWCP please confirm that they are in compliance with whatever that regulation would require of them. In particular;

- 1) What is the chemical composition of what is being stored in that FRAC tank?
- 2) Where is that stored FRAC tank product going?
- 3) Under what manifests are the FRAC tank product being transported to that destination?

Thank you.

Hi Darryl,

Thank you for taking my phone call this afternoon. As we discussed, this location is not permitted by the Industrial Wastewater Control Program (IWCP) because they do not discharge industrial wastewater to the sewer system. The IWCP inspected this site in 2022 and found the wastewater from cleaning/power washing the portable toilets went to a storage tank which was not connected to sewer, and instead pumped out as needed and hauled off-site for disposal. I recommend reaching out to the County of San Diego Department of Environmental Health. Their general information line is (858)

505-6700 and full contact information can be found on their [website](#).

Thank you,

Steven Jarvis

Mr. Jacob Garcia,

I visited your office a few weeks ago to see if there were records and permits of the United Rentals human waste processing being done at their 6144 Federal Blvd. SD CA 92114 property. I am the neighboring property owner at 6176 Federal Blvd. and the noise and smell from this operation has gotten to be intolerable. The 10 or more vacuum trucks who bring the daily porta-potty waste into the FRAC tank use this as their central storage tank for the waste. My question is where does it go once it's in the FRAC tank? Is this a completely compliant process with your agency?

Thank you in advance for your assistance.

Hi Darryl,

The Industrial Wastewater Control Program is tasked with protecting the sewer system by regulating industrial wastewater discharges to the sewer system. As this location does not discharge industrial wastewater to the sewer, they are not permitted by our program. The County of San Diego Department of Environmental Health deals with environmental health concerns including regulating hazardous materials and wastes; I will make a referral over to their program.

Thank you,

Steven Jarvis

Good Morning,

We received a complaint from Darryl Cotton regarding odors coming from an above ground storage tank on the property of United Rentals - Reliable Onsite Services located at 6144 Federal Boulevard, San Diego. Below is the email we received from the contact, and I have attached the additional information he provided. Our program conducted an inspection of this site a couple of years ago and found the wastewater from the power washing of portable toilets (using detergents) was routed to a storage tank. The storage tank was not connected to sewer, and the business stated the tank was emptied and hauled off-site for disposal as needed. As they did not discharge industrial wastewater to the sewer system, our program did not issue a permit to this site. I am referring this complaint over to your department because this seems like an environmental health issue.

Thank you,

Steven Jarvis

From Garcia, Jacob <JacobAG@sandiego.gov>

Date Tue 1/27/2026 3:10 PM

To David Perez <dperez3@ur.com>; Jeffrey Walker <jwalker5@ur.com>

Hello,

I have added the following vehicle to PMT-37888 effective 1/27/2026.

License Plate#: 95407F4

Year: 2023

Make: Peterbilt

Capacity: 4,000

Please print out a copy of this email as an official document stating that you are authorized to discharge using this license at Pump Station 1. Keep it in the appropriate truck along with your current permit and notify the IWCP of any changes.

Thank you,

Jacob Garcia

Hi Jeff,

Attached is a copy of your current permit. When emailing please add in email subject line so there is no confusion and I can find your sites permit.

As of right now I have the:

1. TW Permit #-37888
2. DEH Permit- 026163
3. License #-95407F4

I also need the:

4. Make/ Model
5. Capacity

Thank you,

Hi Jacob,

Are you referring to our Trucked Waste Permit?

We submitted the application in Sept. and have not received a copy of it. That typically comes from your office doesn't it?

Here is the one David provided to us that expired in Sept.

We haven't received the updated one that was sent in for renewal (See attached).

Jeff

Hello,

My name is Jacob Garcia and I am the new trucked waste inspector. I was forwarded your email by my staff regarding adding a truck to your sites permit.

Can you please email me your sites Domestic Permit #, license plate for the truck you plan to add, and DEH sticker/ permit which shows the truck you added.

Thank you,
Jacob Garcia

Public Records Act Request to OCSD — Ref. P004671-080826

PUBLIC RECORDS ACT REQUEST

To: Clerk of the Board / Public Records Act Coordinator Orange County Sanitation District (“OC San” / OCSD) 18480 Bandilier Circle, Fountain Valley, CA 92708 *(Please route to the Source Control Division as records custodian.)*

From: Darryl Cotton, 6176 Federal Boulevard, San Diego, CA 92114 · (619) 954-4447 · 151DarrylCotton@gmail.com

Date: August 8, 2026

Re: California Public Records Act request (Gov. Code § 7920.000 et seq.) — wastehauler permit and discharge records for United Rentals (North America), Inc., dba Reliable Onsite Services

Under the California Public Records Act, I request to inspect and obtain copies of the following records of the Orange County Sanitation District, for the period **December 1, 2022 to the present**, relating to **United Rentals (North America), Inc., doing business as Reliable Onsite Services** (and any related account, DBA, or affiliated entity operating sewage-hauling trucks from 6144 Federal Boulevard, San Diego, CA), and its sewage-hauling vehicles:

1. **Permit records.** Any Wastehauler Discharge Permit application(s), issued permit(s), renewals, truck/decal registrations, and current permit status issued to or held by the above entity under OCSD-53 (Section 306) and the Source Control Division’s wastehauler program — including the list of any trucks/decals registered under any such permit.
2. **Discharge / manifest records.** Any Waste-Tracking Forms, manifests, discharge logs, gate or station sign-in records, volume/gallongage records, and billing or invoice records reflecting discharges by the above entity or its trucks at the OCSD Wastehauler Station (or any OCSD facility), including records showing the dates, volumes, and number of such discharges (or reflecting that none occurred).
3. **Load sampling / acceptance records.** Any samples collected, analytical or laboratory results, pH or characteristic measurements, and any acceptance, rejection, or non-compliance records for loads discharged by the above entity or its trucks (per OCSD-53 Section 210.A).
4. **Correspondence.** Any correspondence between OCSD and the above entity regarding permitting, discharge, truck registration, or compliance.

If no responsive records exist within any category above — for example, if the entity holds no wastehauler permit or has no discharge records at OCSD facilities — I ask that the District so state, as the absence of records is itself responsive to my request.

Please provide records in electronic format where available. If any portion is withheld, please identify the specific exemption claimed and provide all reasonably segregable non-exempt portions. If you anticipate any duplication cost, please contact me before incurring it. I look forward to your determination within ten days as provided by Government Code § 7922.535.

Thank you for your assistance.

Respectfully,
Darryl Cotton

EXHIBIT 13

Public Records Act Request to City of San Diego — Pump
Station 1 Records (PRA 26-7900)

PUBLIC RECORDS ACT REQUEST

To: City of San Diego — Public Records Administration (*Please route to the Public Utilities Department, Industrial Wastewater Control Program ("IWCP"), as records custodian.*)

From: Darryl Cotton, 6176 Federal Boulevard, San Diego, CA 92114 · (619) 954-4447 · 151DarrylCotton@gmail.com

Date: August 8, 2026

Re: California Public Records Act request (Gov. Code § 7920.000 et seq.) — Pump Station 1 discharge and truck-authorization records for United Rentals (North America), Inc., dba Reliable Onsite Services (Trucked Domestic Waste Hauler Permit **IU# 25-0604**). *This request supplements PRA No. 26-6533 and seeks discharge-activity and truck-roster records not included in that production.*

Under the California Public Records Act, I request to inspect and obtain copies of the following records of the City of San Diego, for the period **December 1, 2021 to the present**, relating to **United Rentals (North America), Inc., doing business as Reliable Onsite Services**, under Trucked Domestic Waste Hauler Permit **IU# 25-0604** (and any predecessor, successor, related, or pending account number for the same entity, including **IU# 10-0568**):

1. **Pump Station 1 discharge records.** All records reflecting hauled-waste discharges by the above entity or its trucks at the City's Pump Station 1 (Harbor Drive disposal) — including discharge manifests, vouchers, discharge logs, gate or attendant sign-in logs, weigh or metering records, and volume/gallongage records — showing the **date, truck/trailer and license plate, and volume of each discharge** (or reflecting that no such discharge occurred).
2. **Authorized-truck roster.** The current and historical list of trucks/trailers and license plates authorized or registered to discharge at Pump Station 1 under IU# 25-0604, including California license-plate registrations, any temporary plate authorizations issued, and the date each truck was added to or removed from the authorized list.
3. **Violations, rejections, and error notices.** Any Notices of Violation, voucher or manifest error notices, turn-aways, or rejections issued to or concerning the above entity or its trucks at Pump Station 1.
4. **Billing / invoice records.** Any billing, invoice, or account records reflecting charges for Pump Station 1 discharges under the above account.
5. **Correspondence.** Any correspondence between the City and the above entity regarding Pump Station 1 discharge, truck registration, plate/temporary-plate authorization, or discharge compliance, to the extent not already produced in PRA No. 26-6533.

If no responsive records exist within any category above — for example, if the account has no Pump Station 1 discharge records for a given period, or if only one truck was ever authorized — I ask that the City so state, as the absence of records is itself responsive to my request.

Please provide records in electronic format where available. If any portion is withheld, please identify the specific exemption claimed and provide all reasonably segregable non-exempt portions. If you anticipate any duplication cost, please contact me before incurring it. I look forward to your determination within ten days as provided by Government Code § 7922.535.

Thank you for your assistance.

Respectfully,

Darryl Cotton

EXHIBIT 14

Video Log — Dated Video/Photographic Captures of the
Operation at 6144 Federal Blvd. (native files available on
request)

VIDEO LOG

Dated video and photographic captures of the operation at 6144 Federal Boulevard, San Diego

This is a log of dated video and photographic captures of the operation at 6144 Federal Boulevard, San Diego. Each entry is identified by date and time; the underlying native-format files are retained and available to the Division for inspection on request.

August 3, 2026 at 3:27 p.m. shows two United Rentals / Reliable Onsite vacuum tank trucks in operation with the FRAC tank at their 6144 Federal Blvd. yard approximately 4 feet from the adjacent yard at 6176 Federal Blvd..

VIDEO LOG
